XUEJIAN(JACOB) SHEN

xuejian@mit.edu ◇ Personal Site ◇ ORCID 0000-0002-6196-823X
Massachusetts Institute of Technology
77 Massachusetts Ave, Cambridge, MA 02139, USA

EDUCATION

California Institute of Technology Sept 2018 - June 2023
Ph.D., Physics; Advisor: Prof. Philip Hopkins
Thesis: Cosmic structure and galaxy formation in alternative dark matter

Peking University Sept 2014 - June 2018
B.S., Physics

EMPLOYMENT

Postdoctoral Researcher Oct 2023 - present
Kavli Institute for Astrophysics and Space Research
Massachusetts Institute of Technology

SubMIT Project Team Oct 2023 - present
Department of Physics, Massachusetts Institute of Technology

Graduate Teaching & Research Assistant Jan 2019 - June 2023
California Institute of Technology

RESEARCH INTERESTS

Cosmological simulations of galaxy formation; The nature of dark matter; Formation and evolution of galaxies and supermassive black holes at high redshift
UAT Keywords: galaxy formation (595) – galaxy evolution (594) – dark matter (353)

SUMMARY OF PUBLICATIONS

Total publications: **59** (37 refereed)
First-author publications: **13**; From supervised students: **9**
Metrics: **>2000 citations**, **>750 first-author citations**, **h-index: 26**
(see attached publication list for details)

AWARDS & FELLOWSHIPS

Neil Gehrels Prize Fellowship (declined) University of Maryland 2022
KIPAC Fellowship (declined) Stanford University, 2022
TCCAP Fellowship (declined) University of Texas at Austin, 2022
James A. Cullen Memorial Fellowship Caltech, 2022
Honored Graduate Peking University, 2018
Robin Li Fellowship Peking University, 2017
Meritorious Award Mathematical Contest in Modeling, 2017
HaiLiang Fellowship Peking University, 2016
GuangHua Fellowship Peking University, 2015

RESEARCH GRANTS

As Principal Investigator (PI)
JWST-AR-Theory (04814) $329597.05 10/2024 – 10/2026

TEACHING & ADVISING

Caltech Graduate Teaching Assistant, Computational Physics Lab Ph20/21/22
Lectures, MIT Physics 8.902 (2023,2024)

Undergraduate & Master Students:
Gabriel Aguiar (Caltech, 2021-2022), Eitan Rapaport (Caltech, 2022-2023), Evan Erickson (MIT, 2023-), Yongao Hu (MIT, 2024), Hui Wang (MIT, 2023-2024), Vinh Tran (MIT, 2023-), Aidan Leonard (MIT, 2023-2024), Zihao Wang (NJU & MIT, 2023-), Charline Shen (Harvard, 2023-), Qiaorong Yu (Oxford, 2025), Xiaoqing Sun (MIT, 2024)

SYNERGISTIC ACTIVITIES

Professional Services
- Journal Referee for Monthly Notices of the Royal Astronomical Society (MNRAS, since 2020), MNRAS Letters (since 2023), The Astrophysical Journal (ApJ, since 2022), ApJ Letters (since 2022), Scientific Reports (Since 2023), Physics Review Letters (PRL, since 2024), Physics Review D (PRD, since 2023)
- Oscii Bascii (& Grad student representative) of Theoretical AstroPhysics Including Relativity and Cosmology (TAPIR, 2019-2022), Caltech
- Local Organizing Committee (LOC) for the Galaxy Formation and Evolution in Southern California (GalFRESCA) workshop (2022)
- MIT Physics Basic Computing Services "SubMIT" Project Team Member (since 2023)
- Organizer for MIT Physics Basic Computing Services User Meetings (since 2023)

Outreach
- Speaker at Caltech Stargazing Lecture Series (2023)
- Organizer of Stargazing and Outreach Activities (2015-2018), Peking University

SELECTED TALKS

Invited Talks
- Cosmic Dawn as a portal to New Physics — Nanjing University, 09/2025
- Cosmic Dawn as a portal to New Physics — Peking University, 09/2025
- Cosmic Dawn as a portal to New Physics — Tsinghua University, 09/2025
- Alternative dark matter in the THESAN simulations — DREAMS collaboration meeting, CCA, 05/2025
- Challenges to galaxy formation models at the cosmic frontier — Yale University, 04/2025
- Challenges to galaxy formation models at the cosmic frontier — CCA, Flatiron Institute, 10/2024
- Challenges to galaxy formation models at the cosmic frontier — Zhejiang University, 09/2024
- Challenges to galaxy formation models at the cosmic frontier — Univ. of Texas Austin, 08/2024
- Challenges to galaxy formation models at the cosmic frontier — Univ. of Cambridge, 06/2024
- The implication of UV variability for the bright galaxy abundance at cosmic dawn — Tsinghua University, 09/2023
- The implication of UV variability for the bright galaxy — KIAA seminar, Peking Univ., 09/2023

abundance at cosmic dawn

- Dark Matter: Elusive fibers of the Universe — Stargazing Lecture, Caltech, 05/2023
- New aspects about dark matter models beyond CDM — KIPAC tea talk, Stanford, 02/2023
- Alternative dark matter and structure formation — Obs. Cosmo. seminar, Caltech, 11/2021

Contributed Talks

- Quasar luminosity functions and clustering in THESAN-XL — Thesan workshop, Harvard CfA, 08/2025
- The rich astrophysical phenomenology in a dissipative dark sector — SIDM workshop, Valencia, 06/2025
- Flash talk: Supermassive black hole seeds from dark matter — CFC meeting, Austin, 05/2025
- Basic Computing Service Review: OpenMPI and Data Transfer — MIT, 05/2025
- First results from the THESAN-ZOOM simulations — Journal Club, MIT, 03/2025
- Star-formation efficiencies in high-redshift galaxies learned from THESAN-ZOOM — Harvard CfA, 03/2025
- Early dark energy as a unified solution to the Hubble tension and early galaxy puzzles raised by JWST — KITP conference, 08/2024
- Insights on efficiency and variability of star-formation from radiation-hydro simulations — Santa Cruz Galaxy Formation Workshop, 08/2024
- Basic Computing Service Review: Custmizations and Community Engagement — MIT, 08/2024
- Challenges to galaxy formation models at the cosmic frontier — Journal Club, MIT, 04/2024
- Challenges to galaxy formation models at high redshifts — University of Vienna, 02/2024 "Building Galaxies from Scratch"
- Galaxy sizes during the epoch of reionization — Harvard CfA, 02/2024
- The implication of UV variability for the bright galaxy abundance at cosmic dawn — ITC luncheon, Harvard CfA, 10/2023
- Galaxy in the epoch of reionization in alternative dark matter — UCLA DM meeting, 03/2023
- Alternative dark matter in galaxy formation — Dark Cosmos seminar, Princeton, 10/2022
- Alternative dark matter in galaxy formation — Brown Bag lunch talk, MIT, 10/2022
- Alternative dark matter in galaxy formation — Harvard CfA, 10/2022
- Alternative dark matter in galaxy formation — FIRE seminar, 10/2022
- Dwarf galaxies in dissipative dark matter — GalFRESCA workshop, 09/2022
- High-redshift predictions from the Illustris-TNG simulations — MIT, 08/2019
- High-redshift predictions from the Illustris-TNG simulations — Caltech, 06/2019

SELECTED PRESS COVERAGE

Kavli Foundation News: "Early" Dark Energy Could Explain Anomalous Galaxies and the Universe's Disjointed Expansion Rate
Univ. of Cambridge News: Dark energy in the early universe could solve two major problems in cosmology
UT Austin News: Early Dark Energy Could Resolve Cosmology's Two Biggest Puzzles
Yahoo News: How dark energy could relieve 'Hubble tension' and galaxy headaches
Phys.org: Early dark energy could resolve cosmology's two biggest puzzles
MirageNews: Early Dark Energy May Solve Cosmology's Top Two Mysteries
MIT News: Early dark energy could resolve cosmology's two biggest puzzles
CCA News: Bursts of Star Formation Explain Mysterious Brightness at Cosmic Dawn
Space.com: Dark matter atoms may form shadowy galaxies with rapid star formation
Northwestern News: Bursts of star formation explain mysterious brightness at cosmic dawn
Phys.org: Dark matter can make dark atoms, say theoretical astrophysicists
Scientific American: JWST's Glimpses of Early Galaxies Could Shed Light on Dark Matter
Astrobites: Forecasting the obscured first few billion years

Introducing the THESAN-ZOOM project: radiation-hydrodynamic simulations of high-redshift galaxies with a multi-phase interstellar medium. *arXiv e-prints*, page arXiv:2502.20437, February 2025

18. Maria C. Straight, Michael Boylan-Kolchin, James S. Bullock, Philip F. Hopkins, **Xuejian Shen**, Lina Necib, Alexandres Lazar, Andrew S. Graus, and Jenna Samuel. Central densities of dark matter halos in FIRE-2 simulations of low-mass galaxies with cold dark matter and self-interacting dark matter. *arXiv e-prints*, page arXiv:2501.16602, January 2025

19. Tri Nguyen, Francisco Villaescusa-Navarro, Siddharth Mishra-Sharma, Carolina Cuesta-Lazaro, Paul Torrey, Arya Farahi, Alex M. Garcia, Jonah C. Rose, Stephanie O'Neil, Mark Vogelsberger, **Xuejian Shen**, Cian Roche, Daniel Anglés-Alcázar, Nitya Kallivayalil, Julian B. Muñoz, Francis-Yan Cyr-Racine, Sandip Roy, Lina Necib, and Kassidy E. Kollmann. How DREAMS are made: Emulating Satellite Galaxy and Subhalo Populations with Diffusion Models and Point Clouds. *arXiv e-prints*, page arXiv:2409.02980, September 2024

20. Isabel S. Sands, Philip F. Hopkins, **Xuejian Shen**, Michael Boylan-Kolchin, James Bullock, Claude-Andre Faucher-Giguere, Francisco J. Mercado, Jorge Moreno, Lina Necib, Xiaowei Ou, Sarah Wellons, and Andrew Wetzel. Confronting the Diversity Problem: The Limits of Galaxy Rotation Curves as a tool to Understand Dark Matter Profiles. *arXiv e-prints*, page arXiv:2404.16247, April 2024

CONFERENCE PROCEEDINGS

1. Thomas Waters, Colton Peterson, Razieh Emami, **Xuejian Shen**, Lars Hernquist, Randall Smith, Mark Vogelsberger, Charles Alcock, Grant Tremblay, Matthew Liska, John Forbes, and Jorge Moreno. Gas Morphology of Milky Way-like Galaxies in the TNG50: Signals of Twisting and Stretching. In *American Astronomical Society Meeting Abstracts*, volume 55 of *American Astronomical Society Meeting Abstracts*, page 279.02, January 2023

2. **Xuejian Shen**, Philip Hopkins, Lina Necib, Fangzhou Jiang, Michael Boylan-Kolchin, and Andrew Wetzel. Dissipative Dark Matter on FIRE: Structural and kinematic properties of dwarf galaxies and observational constraints. In *American Astronomical Society Meeting #240*, volume 54 of *American Astronomical Society Meeting Abstracts*, page 347.06, June 2022
