

XUEJIAN(JACOB) SHEN

xuejian@mit.edu ♦ [Personal Site](#) ♦ ORCID [0000-0002-6196-823X](#)

Massachusetts Institute of Technology
77 Massachusetts Ave, Cambridge, MA 02139, USA

EDUCATION

California Institute of Technology	Sept 2018 - June 2023
Ph.D., Physics	
Academic and Research Advisor: Prof. Philip Hopkins	
Thesis Title: Cosmic structure and galaxy formation in alternative dark matter	
Peking University	Sept 2014 - June 2018
B.S., Physics	
Advisor: Prof. Fukun Liu	
Thesis Title: Strengthened Kozai-Lidov Oscillation and Tidal Disruption Event Rate in Hierarchical SMBH Triplets	

EMPLOYMENT

Postdoctoral Researcher	Oct 2023 - present
Kavli Institute for Astrophysics and Space Research	
Massachusetts Institute of Technology	
SubMIT Project Team	Oct 2023 - present
Department of Physics, Massachusetts Institute of Technology	
Graduate Teaching & Research Assistant	Jan 2019 - June 2023
California Institute of Technology	

RESEARCH INTERESTS

Cosmological simulations of galaxy formation; The nature of dark matter; Formation and evolution of galaxies and supermassive black holes at high redshift
UAT Keywords: galaxy formation (595) – galaxy evolution (594) – dark matter (353)

SUMMARY OF PUBLICATIONS

Total publications: **51** (35 refereed)
First-author publications: **12**; From advised students: **5**
Metrics: **>1600 citations**, **>600 first-author citations**, **h-index: 21**
(see attached publication list for details)

AWARDS & FELLOWSHIPS

Neil Gehrels Prize Fellowship (declined)	University of Maryland	2022
KIPAC Fellowship (declined)	Stanford University,	2022
TCCAP Fellowship (declined)	University of Texas at Austin,	2022
James A. Cullen Memorial Fellowship	Caltech,	2022
Honored Graduate	Peking University,	2018
Robin Li Fellowship	Peking University,	2017
Meritorious Award	Mathematical Contest in Modeling,	2017
HaiLiang Fellowship	Peking University,	2016
GuangHua Fellowship	Peking University,	2015

RESEARCH GRANTS

As Principal Investigator (PI)		
JWST-AR-Theory (04814)	\$329597.05	10/2024 – 10/2025

TEACHING & ADVISING

Caltech Graduate Teaching Assistant, Computational Physics Lab Ph20/21/22
Lectures, MIT Physics 8.902 (2023,2024)

Undergraduate & Master Students:

Gabriel Aguiar (Caltech, 2021-2022), Eitan Rapaport (Caltech, 2022-2023), Evan Erickson (MIT, 2023-), Yongao Hu (MIT, 2024), Hui Wang (MIT, 2023-2024), Vinh Tran (MIT, 2023-), Aidan Leonard (MIT, 2023-2024), Zihao Wang (NJU & MIT, 2023-), Charline Shen (Harvard, 2023-)

SYNERGISTIC ACTIVITIES

Professional Services

- Journal Referee for Monthly Notices of the Royal Astronomical Society (MNRAS, since 2020), MNRAS Letters (since 2023), The Astrophysical Journal (ApJ, since 2022), ApJ Letters (since 2022), Scientific Reports (Since 2023), Physics Review Letters (PRL, since 2024), Physics Review D (PRD, since 2023)
- Oscii Bascii (& Grad student representative) of Theoretical AstroPhysics Including Relativity and Cosmology (TAPIR, 2019-2022), Caltech
- Local Organizing Committee (LOC) for the Galaxy Formation and Evolution in Southern California (GalFRESKA) workshop (2022)
- MIT Physics Basic Computing Services “SubMIT” Project Team Member (since 2023)
- Organizer for MIT Physics Basic Computing Services User Meetings (since 2023)

Outreach

- Speaker at Caltech Stargazing Lecture Series (2023)
- Organizer of Stargazing and Outreach Activities (2015-2018), Peking University

SELECTED TALKS

Invited Talks

- Alternative dark matter in THESAN DREAMS collaboration meeting, CCA, 05/2025
- Challenges to galaxy formation models at the cosmic frontier Yale University, 04/2025
- Challenges to galaxy formation models at the cosmic frontier CCA, Flatiron Institute, 10/2024
- Challenges to galaxy formation models at the cosmic frontier Zhejiang University, 09/2024
- Challenges to galaxy formation models at the cosmic frontier Univ. of Texas Austin, 08/2024
- Challenges to galaxy formation models at the cosmic frontier Univ. of Cambridge, 06/2024
- The implication of UV variability for the bright galaxy abundance at cosmic dawn Journal Club, Tsinghua Univ., 09/2023
- The implication of UV variability for the bright galaxy abundance at cosmic dawn KIAA seminar, Peking Univ., 09/2023
- Dark Matter: Elusive fibers of the Universe Stargazing Lecture, Caltech, 05/2023
- New aspects about dark matter models beyond CDM KIPAC tea talk, Stanford, 02/2023
- Alternative dark matter and structure formation Obs. Cosmo. seminar, Caltech, 11/2021

Contributed Talks

- The rich astrophysical phenomenology in a dissipative dark sector SIDM workshop, Valencia, 06/2025
- Flash talk: Supermassive black hole seeds from dark matter CFC meeting, Austin, 05/2025
- First results from the THESAN-ZOOM simulations Journal Club, MIT, 03/2025
- Star-formation efficiencies in high-redshift galaxies learned from THESAN-ZOOM Harvard CfA, 03/2025
- Early dark energy as a unified solution to the Hubble tension and early galaxy puzzles raised by JWST KITP conference, 08/2024
- Insights on efficiency and variability of star-formation from radiation-hydro simulations Santa Cruz Galaxy Formation Workshop, 08/2024
- Challenges to galaxy formation models at the cosmic frontier Journal Club, MIT, 04/2024
- Challenges to galaxy formation models at high redshifts University of Vienna, 02/2024
- Galaxy sizes during the epoch of reionization “Building Galaxies from Scratch” Harvard CfA, 02/2024
- The implication of UV variability for the bright galaxy abundance at cosmic dawn ITC luncheon, Harvard CfA, 10/2023
- Galaxy in the epoch of reionization in alternative dark matter UCLA DM meeting, 03/2023
- Alternative dark matter in galaxy formation Dark Cosmos seminar, Princeton, 10/2022
- Alternative dark matter in galaxy formation Brown Bag lunch talk, MIT, 10/2022
- Alternative dark matter in galaxy formation Harvard CfA, 10/2022
- Alternative dark matter in galaxy formation FIRE seminar, 10/2022
- Dwarf galaxies in dissipative dark matter GalFRESCA workshop, 09/2022
- High-redshift predictions from the Illustris-TNG simulations MIT, 08/2019
- High-redshift predictions from the Illustris-TNG simulations Caltech, 06/2019

SELECTED PRESS COVERAGE

Kavli Foundation News: "Early" Dark Energy Could Explain Anomalous Galaxies and the Universe's Disjointed Expansion Rate

Univ. of Cambridge News: Dark energy in the early universe could solve two major problems in cosmology

UT Austin News: Early Dark Energy Could Resolve Cosmology's Two Biggest Puzzles

Yahoo News: How dark energy could relieve 'Hubble tension' and galaxy headaches

Phys.org: Early dark energy could resolve cosmology's two biggest puzzles
